

Call for Applications: ENRICH in the USA Entrepreneurial Skills Development Program (EDSP)

**ENRICH your Research Commercialization Potential and Network
Entrepreneurial Skills Development Program (ESDP)**

Rolling Application opens: June 13, 2019

A pilot service offered by ENRICH in the USA

ENRICH in the USA is launching an Entrepreneurial Skills Development Program (EDSP) for researchers and invites early and mid-career researchers based in the EU Member States or Horizon 2020 Associated Countries, whose research has a high innovation potential and who aim to investigate the possibilities of commercializing their research.

This service gives you the opportunity to not only connect with US Institutions and potential partners but practice negotiations as well and learn how to convert research discoveries into marketable products and how to attract funding and sponsoring.

We warmly welcome you in San Diego CA, USA, where the Entrepreneurial Skills Development Program takes place. We are looking forward to a productive week with you. Training on research commercialization aspects, technology transfer, licensing, patents, IP, skill-development and much more will be delivered to you by leading US experts in this field. During your stay you will have the chance to choose from 50+ professional training courses and workshops during the American Chemical Society's national meeting with 15,000+ attendees from around the world.

The fuel for your innovation career kick-off!

As the final highlight, the Entrepreneurial Skills Development Program and the American Chemical Society are offering you a match-and-meet with highly engaged and experienced mentors. The mentoring fosters your personal development through participation in the insider knowledge of experience of senior managers (mentors), which is made possible by a direct and exclusive relationship.

Please find the tentative agenda and more information [here](#).

To receive more information about our current European participants, please contact:
